HUNTERS ELEMENT SUSTAINABILITY PROMISE

A conversation from around the campfire planted a seed in 2017, and from there we started looking at meaningful ways to reduce our environmental impact.

We started by eliminating single-use plastic bags on all our products in 2018. We then found that we could use recycled card and vegetable inks to create home compostable swing tags and packaging.

From 2019 we started introducing Organic Cotton and Recycled PET (plastic bottles) fabrics. By Autumn 2020 we were in full swing introducing this to a large portion of our product range which we have continued through to our Spring Summer range. These are just as durable and just as comfortable as traditional fabrics. While the cost is a little higher, the reduced impact on our fragile environment far outweighs paying a few bucks more.

Made from recycled polyethylene terephthalate (Plastic Bottles). A durable, recyclable RPET fabric.

This fabric is made of sustainable, biodegradable, durable, hypoallergenic, 100% organic cotton.

For each sale of marked products, \$1 goes towards the LEAVE ONLY TRAILS FUND™. Investing in sustainability and environmental restoration for hunters and anglers.

40% OF OUR CLOTHING RANGE USES RECYCLED FABRIC.

SINCE **2019** WE HAVE REMOVED OVER **3.8 MILLION PLASTIC BOTTLES** FROM LANDFILL.

THIS EQUATES TO **810 BARRELS OF OIL** WE WON'T BE USING TO MAKE THE VIRGIN MATERIAL AND ELIMINATING OVER **94 TONNES OF CO² EMISSIONS** WE WOULD OTHERWISE BE LETTING LOOSE INTO THE ATMOSPHERE.

THIS HAS ALSO REDUCED THE WATER USED IN OUR PRODUCTION BY OVER **5.8 BILLION LITRES**.

95% OF ALL OUR DWR TREATED PRODUCTS USE **PFC FREE** DURABLE WATER REPELLENT.

100% OF ALL OUR DOWN FILLED PRODUCTS USE **ETHICALLY SOURCED RDS CERTIFIED DOWN**.

WE HAVE RAISED OVER **\$110,000** FOR ENVIRONMENTAL CAUSES IN CONJUNCTION WITH OUR LEAVE ONLY TRAILS FUND™ SINCE 2019.

WE'VE ALREADY INVESTED **\$310,000** IN SUSTAINABLE PROCESSES, PACKAGING AND MATERIALS WITH THIS INITIATIVE. WE EXPECT THIS NUMBER TO REACH CLOSE TO **\$1 MILLION** OVER THE NEXT **10** YEARS.

99% OF ALL OUR PRODUCTS USE **RECYCLED/COMPOSTABLE** PACKAGING.

WE'RE ON TRACK TO SAVE **150 TONNES OF NEW CARD** AND **25 TONNES OF PLASTIC** BY **2025**.

THE GOAL IS TO BE COMPLETELY CARBON NEUTRAL BY **2030**.

OUTER LAYER

RAIN BARRIER

Waterproof barrier layers are a survival tool. They need to be ultra-packable, so they are small enough to be carried with you at all times in case you get caught out overnight or if the weather changes unexpectedly.

- Protects from wind, rain and snow
- Dries quickly
- Seam-sealed
- DWR treated to minimise fabric saturation
- Ultra-packable
- Large armpit zippers to dump excess heat
(Available on some models)

WIND BARRIER

Windproof barrier garments are designed to block wind, light showers and keep you warm.

- Protects wind and light showers
- Keep you warm
- Dries quickly
- Packable
- Large armpit zippers to dump excess heat
(Available on some models)

ATLAS JACKET

Created in the lab, verified in the Alps. The Alpine environment demands ultra-light and ultra-breathable in place of all around balance. The Atlas is a technology driven, specialised product. This series was created for the mountains, where durability, water shedding and packability must be prioritised over stealth. The long cut, TunnelTECH™ hood and body mapped design allows for ultimate comfort and freedom of movement while wearing thick layers underneath and heavy packs that pull and constrict. Premium water resist YKK® zips, carefully placed chest and lower pockets, massive heat-dumping pit zips and next-gen seam tape make up the Atlas as the pinnacle in performance hunting jackets. Built for the mountain environment where alpine species thrive and weather is brutal, the Atlas series is a highly technical and design focused response. Climb high, keep dry and keep protected in the most demanding hunting conditions on the planet.

30,000mm minimum, waterproof rating (JIS Testing) and 40,000gm/m2/24hr breathability rating

Weight Sz M: 750 grams

HYDRAFUSE™ DURAWEAWE VALOUR™ fabric is incredibly durable, waterproof, quiet, packable, and insanely breathable

27 plastic bottles saved from ending up in landfill

Premium water resist YKK® Aquaguard™ zips

PFC free durable water repellent

Two streamlined chest pockets with ample room for big bins or protection for hands in icy wind. Positioned high so water doesn't run down your forearms and into the pockets and accessible while wearing a pack

Two streamlined lower pockets to stash extra gear

Fully adjustable TunnelTECH™ hood with a stiff yet flexible peak, ergonomic shape, plenty of peripheral vision and Cohesive™ cord locks

Adjustable cuffs and waistcord to lock out draft and lock in core warmth

Giant pit zips to dump heat quickly on the move

Sizes XS-7XL

Available in Sand/Charcoal

ATLAS JACKET

Created in the lab, verified in the Alps. The Alpine environment demands ultra-light and ultra-breathable in place of all around balance. The Atlas is a technology driven, specialised product. This series was created for the mountains, where durability, water shedding and packability must be prioritised over stealth. The quick changing weather in the mountains calls for multiple gear changes throughout the day, pants are often ignored due to the effort involved in stripping off boots and keeping socks dry. The Atlas pants have grunty, full length water resist YKK® zips, allowing you to pull the over-pants on or off easily over the top of your boots and gaiters when the weather changes. This means keeping dry or cool legs is no harder than pulling a jacket on or off. They can disappear into the bottom of your pack with barely any sacrifice to bulk and weight. When in action the carefully sculpted design gives maximum articulation in the knees and ass, so they won't bind and pull on your thighs and shins. Built for the mountain environment where alpine species thrive and weather is brutal, the Atlas series is a highly technical and design focused response. Climb high, keep dry and keep protected in the most demanding hunting conditions on the planet.

30,000mm minimum, waterproof rating (JIS Testing) and 40,000gm/m2/24hr breathability rating

Weight Sz M: 540 grams

HYDRAFUSE™ DURAWEAWE VALOUR™ fabric is incredibly durable, waterproof, quiet, packable, and insanely breathable

ODYSSEY JACKET V2

The Odyssey Jacket is like nothing else on the market. Although it looks like another raincoat the Odyssey is so much more. It was designed in the hills by professional hunters who smash gear harder and faster than any of us. Every detail from the angle of the pocket zips to the waterproof membrane was stringently and ruthlessly developed to produce a hunting jacket that fits better than the others, last longer than the others, feels better than the others and performs like nothing you've ever experienced. Made from recycled polyethylene terephthalate (RPET) so you can also feel good about the environmental cost.

22,000mm waterproof rating (JIS testing)

10,000gm/m2/24hr breathability rating

A durable, recycled, recyclable, waterproof & breathable RPET Duraweave™ outer fabric

Revamped pocket layout to improve ergonomics and easy of use

Weight SzM: 900g - Now lighter than ever!

Two streamlined chest pockets with ample room for big bins

Fully adjustable TunnelTECH™ hood with a stiff yet flexible peak, ergonomic, shape, plenty of peripheral vision and one-touch pullers

ODYSSEY PANTS V2

Built-in conjunction with the Odyssey Jacket, the Odyssey Trousers have been designed with a very clear intention... Be the ultimate waterproof hunting trousers. A pretty simple idea with a huge amount of development invested. The Odyssey Trousers have been made to be lightweight, durable, pack down small, fast-drying, quiet and sculpted to a performance fit. These over trousers have grunty full length zips up the sides so you can pull them on or off straight over the top of your boots and gaiters. Made from recycled polyethylene terephthalate (RPET) so you can also feel good about the environmental cost.

22,000mm waterproof rating (JIS testing)

10,000gm/m2/24hr breathability rating

HALO JACKET & OBSIDIAN TROUSERS

The Halo and Obsidian offer an ultra-light option for extreme weather. Designed as a super packable option for when the weather takes an unexpected turn or for use when things cool down or get wet. They pack down incredibly small and weigh next to nothing, so you will barely notice them sitting in the bottom of your pack. But when they're needed, they're extremely waterproof and breathable, just like your traditionally heavier and bulkier work-horse rain layer. Unlike a lot of backup style rainwear, the Halo & Obsidian were designed with all the important features you still need including a longer cut jacket, athletic shape, sculpted hood and many more. Both the trousers and jacket pack down tiny into their own pockets when not in use so they can disappear into the bottom of your pack.

10,000mm waterproof rating

6,000gm/m2/24hr breathability rating

Hydrafuse™ TECHLITE™ waterproof and breathable 3 layer fabric

PFC free DWR

When packed down, belt loops allow you to attach it to any belt or strap

Available in Desolve® Veil™ Camouflage, Forest Green or Black

Halo Jacket:

Velcro cuff adjusters

Seamless shoulders

Sizes S-4XL

Available in Black

LEGACY JACKET

The Legacy is the brainchild of the Hunters Element head product designer. He wanted to create the ultimate mid/outer layer that could be used on just about every hunt. The Legacy was made to keep you warm while glassing and stalking without overheating, as so often happens with membrane lined outer layers.

The purpose-built 290gsm Hydrafuse™ HYBRIDTECH™, RPET recycled fabric uses a 90gsm water-resistant, two-way stretch outer with a 200gsm fleece inner. This means that the jacket is really warm but breathes exceptionally well, all the while remaining quiet, soft and blocking out about 90% of the wind. This RPET fabric is made from 100% recycled polyethylene terephthalate (Plastic Bottles). This is just as durable as virgin fabric but saves 29 bottles from ending up in the landfill.

He then took every top quality feature he could find and packed them into the jacket. This includes high-quality zips, a fold-away TunnelTECH™ hood, zippered slim-lined chest and lower pockets with hand warmers, and premium cuff adjusters.

Weight Sz M: 850g

Cuts wind

Detachable TunnelTECH™ hood which can also be folded away into collar

Highly breathable wind/water-resistant, recyclable, Hydrafuse™ HYBRIDTECH™ 2-way stretch fabric; made from recycled polyester.

Full-length front YKK® zip

Chest pocket

Adjustable Velcro cuffs

Waist drawstring

PFC free DWR

Zippered handwarmer pockets

Sizes XS-7XL

Available in Desolve@ Veil™ Camo, Forest Green/Grey or Black/Grey

BOULDER TROUSERS

The lightweight, water-resistant outer and high loft fleece inner makes these extremely versatile pants. 290gsm Hydrafuse™ HYBRIDTECH™, RPET recycled fabric uses a 90gsm water-resistant, two-way stretch outer with a 200gsm fleece inner.

This RPET fabric is made from 100% recycled polyethylene terephthalate (Plastic Bottles). This is just as durable as virgin fabric but saves 24 bottles from ending up in the landfill.

This means that the pants are really warm but breathe exceptionally well, all the while remaining quiet, soft and blocking out about 90% of the wind. These medium warmth pants are suited for colder weather hunting when you want some extra warmth without the sweat factor that comes with waterproof/windproof pants. Packed full of pockets and features, the Boulder trousers are extremely comfortable and versatile.

Weight SzM: 700g

Highly breathable wind/water-resistant, recyclable, Hydrafuse™ HYBRIDTECH™ 2-way stretch fabric; made from recycled polyester

Dome ankle cuff adjusters

TĀPUA ELITE BUSHCOAT

The Tāpua Bush Coat is Owen's signature garment with his favourite Veil™ & Fire™ camo combo. Short sleeves let the heat out and give freedom of movement, so you don't get tangled in your bow. When it gets cold chuck on the Core base layer and you'll be toasty and warm without overheating.

New front fabric has been added for increased temperature regulation. Hydrafuse® HYBRIDTECH™ fabric is a warm, two-way stretch, hard-faced fleece made from recycled polyester; with exceptional breathability.

The shoulders, back and hood are made of a quiet and water-resistant outer, combined with windproof and shower resistant membrane and fleece lining. This combo makes the Tāpua Bush Coat an extremely versatile hunting jacket.

Let your actions speak louder than your words. The Tāpua Bush Coat will get you places. You will experience new things.

TUSK BUSH COAT

The pinnacle of pig hunting specific garments. This bush coat is tough, comfortable and adaptable to your needs. The Tusk is a badass coat made for smashing through sh!t and getting it done. The AnchorLOK™ chest webbing is designed to work with our Latitude GPS Pouch so you can keep a close eye on the dogs without having to dig around in your pockets.

Two large chest pockets

One chest pocket has our AnchorLOK™ webbing, this enables any molle compatible pouch to be attached here, (our latitude pouch is perfect for the Garmin range of tracking gear) this keeps GPS, radios and tracking handsets where you need them, easily accessible and visible

Reinforced shoulders, back, and pockets with 600D nylon oxford fabric keeps the blood where it belongs on those long carries and makes this top last the distance

Adjustable TunnelTECH™ hood

Internal waist drawstring

Mid-length sleeves protect your upper arms while eliminating any useless annoying cuffs

Available in Forest Green

Sizes S-7XL

INSULATION JACKETS

PrimaLoft® Gold Insulation is the go-to choice for adventurers looking for protection in extreme conditions. Microfibers trap body heat to make this the most thermally-efficient synthetic insulation available, with water-repellency that insulates even in the wettest weather – maintaining 98% of warmth when wet. These unmatched thermal properties also feature breathability, packability and outstanding softness. Created using 55% post-consumer recycled fibers, consider this the pinnacle of insulation performance and environmental stewardship.

From the performance experts at PrimaLoft, Inc., the world's first combination of water-repellent down and hydrophobic fibers completely changes insulation as you know it. PrimaLoft® Silver Insulation Down Blend is the ultimate hybrid of 40% PrimaLoft® ultra-fine fibers and 60% water-repellent down offering no compromises – with warmth equivalent to 650 fill down within your gear, and permanent water-resistant technology that maintains 94% of its warmth when wet. This marks a game-changing innovation with all the lightweight warmth, loft, packability and comfort of standard down, but outstanding wet-weather thermal performance that even dries faster. PrimaLoft® Silver Insulation Down Blend offers innovation that pushes boundaries of what your gear can accomplish, with performance you can feel and trust.

PrimaLoft is committed to using performance to drive our sustainability efforts by pushing the limits of material science. PrimaLoft® RISE™ insulation features 80% post-consumer recycled content and engineered to be lightweight while still delivering maximum performance. Microfibers trap body heat making it the most thermally-efficient synthetic insulation. With much better water resistance properties than down, the synthetic fibres are able to deliver thermal performance and keep retain its loftiness when wet. Its compact nature makes it easy to attain excellent warmth retention without adding bulk.

The Responsible Down Standard (RDS) is an international, voluntary standard that addresses animal welfare in the duck and geese supply chain and chain of custody of down and feather material from certified farms to the final product. RDS aims to ensure that down and feathers come from animals that have not been subjected to any unnecessary harm. We believe that education – through the RDS – is a meaningful way to drive demand for strong animal welfare practices.

Pertex® Eco fabrics are made using recycled yarns, which reduces the demand for raw materials. These fabrics represent our commitment to sustainable design, development and production.

SLEET JACKET

A waterproof puffer jacket made tough and light! A simple concept and an absolute must for everyone's kit. The Sleet jacket has a Hydrafuse™ TechLite™ membrane and outer layer, a premium raincoat outer shell, with a 100gm PrimaLoft® Gold main body insulation and 80gm sleeve insulation. This combination ensures full protection from the elements in cold and wet conditions. The PrimaLoft® synthetic insulation will also continue to hold its loft and heat and perform if water or sweat does find its way in from the inside. Premium features including a YKK® Aquaguard main zip, TunnelTECH™ hood, zippered handwarmer pockets, internal mesh pocket, Velcro cuff adjusters and PFC free DWR make the Sleet a premium barrier for all applications from Tahr hunting in the snow to burning around on the quadbike in the mud.

- Waterproof and breathable Hydrafuse™ TechLite™ membrane and outer layer
- 100gm PrimaLoft® Gold main body insulation
- 80gm PrimaLoft® Gold sleeve insulation
- Seam-sealed
- YKK® aquaguard front zipper
- PFC free DWR
- Fully adjustable TunnelTECH™ hood
- Zippered lower handwarmer pockets
- Internal mesh dump pocket
- Adjustable draw cord on bottom hem
- Adjustable Velcro cuffs with dual cuff system, stretch lycra inner cuff for comfort and a seamless seal between your jacket and cuff
- Sizes S-4XL
- Available in Black or Desolve® Veil™

GLACIER JACKET

The Glacier is truly a premium puffer jacket for the depths of winter. The insulation is made up of a 320gm RDS certified down / Primaloft® Silver blend, with 650 fill power. This fill creates massive heat trapping space within the baffles and offers the best of both worlds that come with down and synthetic insulation. Pertex® Quantum Eco 50D outer fabric is extremely light and tough for maximum breathability and packability. Premium features including a YKK® zips, TunnelTECH™ hood, zippered handwarmer pockets, internal mesh pocket, Velcro cuff adjusters and PFC free DWR make the Glacier a premium puffer for both Alpine hunting expeditions and winter commutes.

320gm RDS Primaloft® Sliver down blend with 650 fill power, meaning more warmth, less weight & increased packability

MID-LAYER

INSULATION AND WARMTH MANAGEMENT

This performance layer must not restrict moisture transfer from your base layer to the atmosphere. You can add more than one layer here to adjust your body temperature to the desired level. Mid-layers can be worn with or without an outer layer, depending on the conditions, use and personal preference.

Mid-layer garments are semi-fitted so they will layer comfortably. As this layer is often used without another layer on top it is important to have good-sized, strategically located zipped pockets.

- High wicking ability & quick drying
- High loft for warmth
- High breathability
- Resist odour causing bacteria
- Durable

BASE LAYER

NEXT TO SKIN MOISTURE CONTROL AND INSULATION

High-performance athletes know that one of the keys to success is taking every small advantage they can find to edge them ahead. Hunters are athletes. We put our bodies through physically demanding encounters, push our fitness to its limit and suffer through harsh temperatures.

We've designed premium athletic base layers to maximise your performance in the hills. Our compression, body-mapped design promotes reduced muscle fatigue and delivers maximum thermal and wicking properties through high surface contact. Our intelligent, technical fibres and weaves offer the latest advancements in moisture management and heat distribution.

VANTAGE HOODIE

The Vantage Hoodie is a sun shield and sweat vacuum. Made from our newest extreme wicking, bamboo charcoal infused honeycomb fabric. The key to comfort while performing high-intensity activities in the heat of summer is protecting the skin from the sun and removing the uncomfortable sweat that comes with the territory. The Vantage Hoodie has been designed for this job by covering as much of the body as possible and providing the best technology in moisture-wicking fabrics. The hood and integrated face veil can be used not only to shield from the sun but also to provide a stealthier approach for close quarters stalking. Human skin is particularly bright to deer's eyes in low light situations. By covering yourself in Desolve camouflage you give yourself the best possible chance of remaining undetected. It also utilizes two high-performance fabrics in a body-mapped design to allow for maximum movement in the high stretch areas.

Body-mapped design

Lightweight and packable

A durable, recycled, recyclable RPET 145gsm sustainable bamboo charcoal infused honeycomb main fabric; for the best in wicking, quick drying and anti-odour control

High-wicking, highly breathable, quick-drying, super stretchy 125gsm heat control mesh fabric is placed in high movement areas

Integrated face mask with laser cut holes to avoid moisture build-up and fog when wearing glasses

ECLIPSE TOP

The Eclipse Top is a premium warm season base layer to keep you cool when blasting through the hottest parts of the day. It's lightweight, ultra-breathable, and provides key protection from the sun. It's made from bamboo charcoal infused honeycomb fabric. This innovative fabric wicks moisture and dries rapidly. When exposed to the slightest breeze it has an instant cooling effect that provides relief on those blazing summer days. The sustainably sourced charcoal infused with the fabric is antimicrobial and is a natural odour filter, helping you remain undetected. It utilizes two high-performance fabrics in a body-mapped design allowing for maximum movement and rapid heat dumping to ensure you stay dry and cool while hunting in warmer climates. It also feels amazing on the skin!

CORE TOP & LEGGINGS

The Core base layer is designed to regulate your body temperature at the base level through all weather conditions. The body-mapped design has been athletically shaped, so the high-wicking fabric can sit tight to the body in order to absorb and disperse as much sweat as possible, all the while allowing maximum movement in the high-stretch areas. The unique heat control technology means that although the Core has incredible warmth properties while worn under a mid-layer, it also has the ability to cool rapidly when exposed to external air.

Flatlock seams

4-way stretch polyester, highly breathable and high-wicking fabric

Athletic cut for maximum mobility in high-stretch areas

Muscle compression design for increased stamina

Body mapping technology for ultimate temperature and moisture regulation

All-weather base layer for temperatures 5°C to 15°C

WOMEN'S GEAR

FOR THE hardcore HUNTRESS

Our ever-expanding women's range has been designed closely with our team of dedicated, hardcore huntresses to deliver the most comfortable, technical, athletic garments possible for the ultimate user experience. The range works as a complete clothing system from base layer through to barrier, covering all hunting conditions. Get into your element with performance clothing sculpted to fit and designed for absolute comfort!

ODYSSEY JACKET & PANTS

The Odyssey range is like nothing else on the market. Although it looks like another raincoat the Odyssey is so much more. It was designed in the hills by professional hunters who smash gear harder and faster than any of us. Every detail from the angle of the pocket zips to the waterproof membrane was stringently and ruthlessly developed to produce hunting outer layers that fit better than the others, last longer than the others, feels better than the others and performs like nothing you've ever experienced.

22,000mm waterproof rating (JIS testing)

10,000gm/m2/24hr breathability rating

A durable, recycled, recyclable, waterproof & breathable RPET DURAWEAWE ULTRA™ outer fabric with PFC free durable water repellent coating

Available in Desolve® Veil™ Camouflage

Jacket:

Two streamlined chest pockets with ample room for big bins

Fully adjustable TunnelTECH™ hood with a stiff yet flexible peak, ergonomic, shape, plenty of peripheral vision and one-touch pullers

HALO JACKET & OBSIDIAN TROUSERS

The Halo and Obsidian offer an ultra-light option for extreme weather. Designed as a super packable option for when the weather takes an unexpected turn or for use when things cool down or get wet. They pack down incredibly small and weigh next to nothing, so you will barely notice them sitting in the bottom of your pack. But when they're needed, they're extremely waterproof and breathable, just like your traditionally heavier and bulkier work-horse rain layer. Unlike a lot of backup style rainwear, the Halo & Obsidian were designed with all the important features you still need including a longer cut jacket, athletic shape, sculpted hood and many more. Both the trousers and jacket pack down tiny into their own pockets when not in use so they can disappear into the bottom of your pack.

10,000mm waterproof rating

6,000gm/m2/24hr breathability rating

LEGACY JACKET

The Legacy is the brainchild of the Hunters Element head product designer. He wanted to create the ultimate mid/outer layer that could be used on just about every hunt. The Legacy was made to keep you warm while glassing and stalking without overheating, as so often happens with membrane lined outer layers. He then took every top-quality feature he could find and packed them into the jacket. The purpose-built 290gsm Hydrafuse HYBRIDTECH™, RPET recycled fabric uses a 90gsm water-resistant, two-way stretch outer with a 200gsm fleece inner. This means that the jacket is really warm but breathes exceptionally well, all the while remaining quiet, soft and blocking out about 90% of the wind. The Legacy is the absolute ultimate bridge between outer and mid layers for the serious huntress.

Weight Sz M: 700g

Cuts wind

Detachable TunnelTECH™ hood which can also be folded away into collar

Highly breathable wind/water-resistant, recyclable, Hydrafuse™ HYBRIDTECH™ 2-way stretch fabric; made from recycled polyester.

Double-stitched for extra durability

Full-length front YKK® zip

Chest pocket

Adjustable Velcro cuffs

Waist drawstring

PFC free durable water repellent

Zippered handwarmer pockets

29 plastic bottles saved from ending up in landfill

Sizes 6-18

Available in Black

BOULDER TROUSERS

The lightweight, water-resistant outer and high loft fleece inner makes these extremely versatile pants. 290gsm Hydrafuse™ HYBRIDTECH™, RPET recycled fabric uses a 90gsm water-resistant, two-way stretch outer with a 200gsm fleece inner.

This RPET fabric is made from 100% recycled polyethylene terephthalate (Plastic Bottles). This is just as durable as virgin fabric but saves 24 bottles from ending up in the landfill.

This means that the pants are really warm but breathe exceptionally well, all the while remaining quiet, soft and blocking out about 90% of the wind. These medium warmth pants are suited for colder weather hunting when you want some extra warmth without the sweat factor that comes with waterproof/windproof pants. Packed full of pockets and features, the Boulder trousers are extremely comfortable and versatile.

Highly breathable wind/water-resistant, recyclable, Hydrafuse™ HYBRIDTECH™ 2-way stretch fabric; made from recycled polyester

Dome ankle cuff adjusters

Two zippered thigh pockets

YKK® zips

Zip and button fly

Articulated knees

Gusseted inner ankle panels for added protection

Large belt loops

PFC free durable water repellent

Sizes 6-22

Available in Forest Green or Grey/Black

ZENITH TOP

Designed as a true technical hunting mid layer. The Zenith Top is one of the most balanced mid layers available today. This is THE GO-TO TOP for all conditions, all situations, all hunts. The Zenith is light, warm, tough and breathes well when the heat comes on. It utilizes a 280gsm RPET recycled polyester hard-faced, high wicking fleece for the main body, and a 205gsm GRIDstretch™, high wicking, high breathability fleece for the underarms. A "body mapped" design for the ultimate in warmth, wicking & breathability. The high collar protects from harsh sun and cold wind.

High cut collar for wind and sun protection

Highly breathable 205gsm GRIDstretch™, high wicking fleece under arms

A durable, recycled, recyclable RPET 280gsm hard-faced, high wicking fleece main body and outer arms

Lightweight and packable

Slimline chest pocket for crucial equipment

1/2 front zipper for temperature regulation

KID'S GEAR

BORN TO HUNT

For the hunting apprentices and little adventurers, we created gear that will keep up with them as they run a muck. We've take some of our top technical hunting gear and made it mini so there is no compromise in quality. Warm, tough as, lightweight and breathable we made sure comfort is key to help keep them happier out there for longer.

SHOCK JACKET

The Shock Jacket is crucial for keeping the kids dry and warm when out on adventures. The jackets has a strong and quiet Duraweave™ outer with a waterproof and breathable Hydrafuse™ Plus™ membrane. This means the jacket will keep the cold rain and wind out, but allow the body heat to breathe out when things warm up. The Shock true technical coat with quality zips, cuffs, TunnelTECH™ hood and PFC Free DWR coating.

ZENITH TOP

Designed as a true technical hunting mid layer. The Zenith Top is one of the most balanced mid layers available today. This is THE GO-TO TOP for all conditions, all situations, all hunts. The Zenith is light, warm, tough and breathes well when the heat comes on. It utilizes a 280gsm RPET recycled polyester hard-faced, high wicking fleece for the main body, and a 205gsm GRIDstretch, high wicking, high breathability fleece for the underarms. A "body mapped" design for the ultimate in warmth, wicking & breathability. The high collar protects from harsh sun and cold wind.

High cut collar for wind and sun protection

Highly breathable 205gsm GRIDstretch™, high wicking fleece under arms

A durable, recycled, recyclable RPET 280gsm hard-faced, high wicking fleece main body and outer arms

Lightweight and packable

Slimline chest pocket for crucial equipment

1/2 front zipper for temperature regulation

Body-mapped design for athletic fit, maximum movement and heat control in high sweat areas

Sizes 8-14

VANTAGE HOODIE

The Vantage Hoodie is a sun shield and sweat vacuum. The key to comfort while performing high-intensity activities in the heat of summer is protecting the skin from the sun and removing the uncomfortable sweat that comes with the territory. The Vantage Hoodie has been designed for this job by covering as much of the body as possible and providing the best technology in moisture-wicking fabrics. It utilizes two high-performance fabrics in a body-mapped design to allow for maximum movement in the high stretch areas.

Body-mapped design

Lightweight and packable

A durable, recycled, recyclable RPET 145gsm sustainable bamboo charcoal infused honeycomb fabric on the upper thighs; for the best in wicking, quick drying and anti-odour control

High-wicking, highly breathable, quick-drying, super stretchy 125gsm heat control mesh fabric is placed in high movement areas

Integrated face mask with laser cut holes to avoid moisture build-up and fog

PERFORMANCE GLOVES

It's critical that your hands are warm and protected in the mountains. Comfortable hands are better for gripping terrain, steadier at holding binoculars and smoother behind the trigger. The importance of concealing bright skin is also something that shouldn't be overlooked in close-quarter stalking situations. The Hunters Element performance glove range has been crafted to offer key solutions for all hunting scenarios. Hunting requires lighter, faster drying, more durable gear than most other mountain sports, so we've sculpted and tailored our entire glove range to fill these high demands.

HIGHLY DURABLE OUTER

WATERPROOF & BREATHABLE, HYDRAFUSE™ INTERNAL MEMBRANE

INTERNAL FLEECE

SLAT WALL DISPLAY STAND

For the Hunter Element glove range, we're offering a POS system to help customers compare and have an easier time selecting the gloves they need. Traditionally, gloves are a somewhat messy product to display, so we want to offer a more attractive package. After the success of our CORE range merchandising system, we're applying the same concept to do just as good a job in the glove department.

The glove display stand clips into our slat wall or it can be screwed into any standard wall. By providing something both visually appealing and information rich, we will be able to drive higher sales and improve brand experience.

CRUX GLOVES & CRUX FINGERLESS GLOVES

Extreme grip, dexterity and breathability. The Crux stalking gloves are cut from our lightweight Hydrafuse® ToughStretch™ fabric, a new generation of ultrafine 4-way stretch fabric which breathes insanely well in hot conditions while remaining durable. The unique and revolutionary silicone grip-print eliminates the need for rigid palm and finger panels and increases grip by over 70%. The Crux gloves are suited to all warm and mild weather hunting scenarios where additional grip and concealment are required. The Fingerless Crux glove option are for those who want to keep their fingers free for higher sensitivity applications, such as trigger feel.

LEGACY GLOVES

Premium grip and insulation with intense breathability. The Legacy Gloves are built for cool condition hunting encounters. This Hydrafuse® HYBRIDTECH™ fabric is a warm, two-way stretch, hard-faced fleece made from recycled polyester. The extra breathability is designed specifically for the temperature fluctuations that come with most hunting scenarios, including cold mornings glassing, followed by hot hill climbs. The unique and revolutionary silicone grip-print eliminates the need for rigid palm and finger panels as well as increasing grip by over 70%.

Hydrafuse® HYBRIDTECH™ two-way stretch,

hard-faced fleece fabric made from recycled polyester.

BLIZZARD GLOVES

Optimized waterproofing and heat retention. The quiet and rugged RPET DURAWEAWE ULTRA™ outer, married with an Amara leather palm grip, provides premium durability and grip for extreme terrain. The Hydrafuse® GRA-SP™ internal waterproof membrane is extremely waterproof and breathable to offer your hands complete shielding from external water sources while promoting sweat vapping. SPLITfibre™ synthetic fill insulation offers maximum warmth with continued performance properties when water does find it's way in from the inside of the gloves. The Blizzards are designed for maximum performance in extreme conditions.

10,000mm waterproof rating & 5,000gm/m2/24hr breathability rating

PACKS

DURABILITY AND COMFORT

Hunters Element packs are made using the finest fabrics and trims. All zippers used are YKK® and we guarantee they won't break, jam or let you down. All our packs feature 'Double Skin Technology'; which strengthens all seams to prevent tearing. Our packs are also hydration bladder compatible, so you can keep hydrated on the go.

Bags and packs are a core part of your kit and failure is not an option. We have spent hours in the hills with our packs loaded to the brim. It is only after this rigorous testing that we approve them to go to the market.

PACK FEATURES

Hunters Element packs are designed and created with various product features to suit the varied needs of our customers. Over the page is some information to help you understand what each pack has to offer, and which product is right for you.

SUMMIT PACK

Long excursions and lofty ambitions require a pack that can carry in everything you need to dominate the elements on week-long hunts, and carry out the reward of the months of preparation.

The Hunters Element Summit Pack is built with comfort in mind while offering superb functionality. Available in 2 sizes the adjustable top provides up to an extra 10L of storage ensuring that the Summit Pack will cater for every trip. The cutting-edge HYDRAFUSE™ DRYSTEALTH™ HD outer fabric reduces weight by 20% (compared to previous material), increases durability, dries faster, and holds less water to keep the weight down when raining.

65L & 85L capacity

Pack net weight = 2400g, 2500g

HYDRAFUSE™ DRYSTEALTH™ Cordura® outer fabric

Height adjustable Foam Flow harness with load transfer sidebars

VEIL

BOUNDARY PACK

The boundary pack is a premium day pack for the hunters who carry camera equipment, spotting scopes and heavy loads of meat. Alternatively, it can be run as a midsize, light overnight mission pack. We've packed all our best features into this bag with strong construction, technical pocket layout and premium materials.

The custom adjustment, full-support Foam Flow™ harness offers maximum comfort and weight distribution while carrying loads of all weights. The five accessory pockets allow you to separate wet jackets from the main compartment, store scopes, cameras and tripods in fast-access positions. A top-loading closure and multiple compression zip design mean you can cram in lots of gear easily and cinch everything down tight to eliminate movement inside the pack. Ice axe/walking pole attachments and Quick Click™ rifle scabbard allow you to attach your gear quickly and easily and the full cover blaze orange rain cover ensures your kit stays dry in turbulent conditions. YKK® Zippers and YNS® Buckle hardware finish the boundary off as one of the toughest and most reliable serious hunting packs on the market.

35L Capacity

Pack net weight = 2250g

CANYON PACK

Made from quiet and durable StealthSHELL™ fabric with dual-layer reinforcing, the Canyon Pack is perfect for all-day hunts. The pack features a quick release, side rifle holding system and bow attachment. The large main compartment is quickly accessed with a single zip while multiple additional pockets provide plenty of space for crucial gear isolation. Hip pad and internal AnchorLOK™ webbing make bullet access fast and a blaze orange rain cover is hidden away in the pocket underneath. The reinforced bottom section adds extra durability and extra-thick foam padding on the straps and back offer increased comfort. The Foam Flow™ harness employs clever air channels between the foam sections to allow fresh air to pass over your back and a sculpted aluminium brace supports heavy loads. The Ravine is right in that sweet spot where it's big enough to carry a jersey, water, lunch, camera, binos and a raincoat.

25L Capacity

Pack net weight = 1680g

FOOTWEAR

HIGH PERFORMANCE HUNTING FOOTWEAR

Embarking on hardcore expeditions when river crossings, harsh vegetation and rugged terrain are unavoidable, a reliable pair of boots provide the ultimate protection and comfort to keep your mind on the journey ahead.

ELEMENT BOOT

The Element is the ultimate tough, heavy-duty, day-in-day-out hunting boot. The high ankle and new lace-locking system gives your foot complete support. The firm shank and full rand make it bulletproof and stable in the rockiest country.

A heavy-duty rubber rand provides protection against sharp rocks and scree

The TPU CrampLok™ is compatible with both semi-automatic and universal strap crampons

The upper is made from top quality 2.5mm Nubuck leather

The lining is constructed from Hydrafuse™, a heavy-duty waterproof, breathable membrane

An anatomically designed tongue with centre lock lace hook and a soft and durable Nappa leather connection to the upper

Strategically designed perforations in the upper allow air circulation to move around your foot keeping your feet more comfortable

Roller lower lace eyelets paired with locking mid and upper lace hooks means your laces synch up easily and stay locked in place throughout the day

All-terrain comfort insole with a breathable top layer and heavy-duty comfort foam moulds to the shape of your foot to minimize friction and fatigue

A full-length nylon shank with anatomically designed tapered flex provides stable foot placement on uneven terrain and overbending

The new lightweight HIA™ (High Impact Absorption) PU midsole absorbs and softens impact, while assisting in controlling over-pronation and supination, reducing fatigue while on extended expeditions

The aggressive Vibram® T5AVO outsole provides exceptional grip in challenging terrain

Sizes 8-14US

ZULU BOOT

The Zulu is an all-purpose, heavy-duty hunting boot designed for day-in-day-out hunting. The upper is made from quality nubuck leather, with soft flex suede reinforcements and minimal exposed stitching, combining comfort with durability. Heel Lok Articulation has been carefully designed to secure the foot in a highly supported position, allowing for controlled ankle articulation. A full rubber rand is the first line of defence in rocky terrain where sharp edges slice at leather. The Zulu incorporates an internal Hydrfuse waterproof, breathable lining to keep your feet dry while hunting lowland country. And finally, a full shank and EVA midsole provides stable and comfortable footing on all surfaces while the aggressive Vibram Tsavo sole ensures excellent grip on all terrain.

Hydrfuse™ waterproof & breathable lining

Nubuck leather

Heel Lok™ articulation

Full rubber rand

Vibram® TSAVO outsole

Weight sz9: 750g / Boot

Sizes 8-14US

LIMA BOOT

The Lima is a medium duty, multi-purpose hunting boot. The full-length nylon shank with soft-medium flex is great for stalking as quietly as possible. A mid-length cut provides excellent ankle support. An internal Hydrfuse waterproof lining will ensure your feet stay dry. Made from Nubuck Suede leather with double stitched seams and a rubber toe cap in the highest wear area, the Lima is durable and comfortable. Finally, the aggressive Vibram sole provides plenty of grip with plenty of feel.

Nubuck/Suede leather

Hydrfuse™ waterproof lining

Aggressive Vibram® Sole

Double-stitched

Pressed steel lace hooks

Rubber Toe

New wider last

Weight sz9: 700g / Boot

Sizes 6-14US

MAVERICK BOOT

The Maverick isn't just another cheap "stalking" boot. This lightweight boot was built from the forest floor up, one piece at a time, very deliberately. The brand new ACTrek™ XTi LITE™ outsole is crazy aggressive. The sharp, deep, rubber teeth grab like talons when sidling wet, mulchy faces and provide impressive stopping power on slippery descents. Sitting between this and your foot is our tested StalkAIR™ midsole and footbed, light, soft and deadly quiet. The upper is cut from heavy-duty STEELskin™ Polyester Oxford fabric. This has been chosen over leather in this case because it retains almost no water and remains as light as possible in the long dewy grass and muddy game trails. Packed with plenty of other key features, the Maverick, truly is, perfect for silent deerstalking. The high cut gives excellent ankle support when exploring unstable terrain and the Hydrfuse™ REINSoc™ water-resistant lining keeps your feet dry and comfortable.

Aggressive ACTrek™ XTi LITE™ outsole

Heavy-duty STEELskin™ Polyester Oxford upper fabric

Hydrfuse™ REINSoc™ water-resistant lining

EVA StalkAIR™ midsole

Durable toe cap

High ankle support

Desolve® Veil™ Camouflage

Weight sz9: 700g / Boot

Sizes 8-14US

DESOLVE
VEIL

BASIN GAITERS

The tailored and sculpted fit wraps around your leg and over your boot with the least amount of bulk. An angled zip, Velcro and double dome connection has been placed to make the process of doing up and undoing the gaiters a natural angle for your arm to reach, and no hardware will dig into your shins. An incredibly tough lace hook is twin riveted to an over-sized tab that gives you plenty of grip. The main body of the gaiters is made from bombproof Cordura for maximum wear resistance surrounded in a quiet outer. All the seams, zips and velcro are double stitched with heavy-duty thread for maximum durability.

Made from Hydrafuse™ DryStealth™

Rubberised rear elastic to eliminate riding up your boots

Cordura lined for stiffness and durability

Specially designed lace hooks with twin rivets

Durable webbing loops for wire attachment

Quality YKK® zip and secure double stitched front velcro

Double domes

Closure system located on the front to help protect your shins

Quick-adjust webbing strap

Reinforced side panel

Sizes S-2XL

Available in Forest Green or Desolve® Veil™ Camouflage

VENOM GAITERS V2

The Venom V2 Gaiter has been built to the same high standard as the extremely popular Basin Gaiter, but with the added Fang Shield. The Venom V2 gaiter is a tailored sculptured fit to fit your leg and over your boot with the least amount of bulk. All seams, zips and Velcro are double-stitched with heavy-duty thread for maximum durability. The Fang Shield offers a protective layer that was developed and tested on snake fangs from a variety of Australian species.

NEW stalking model. Due to your requests we have introduced the new stalking model to the Venom range. The new Desolve® Veil™ camouflage gaiter is finished with a softer, quieter outer fabric for a silent, undetected approach.

Weight SzM: 350g each

Double-stitched Cordura lining for durability and stab protection

Fang Shield internal membrane

Quick-adjust webbing strap for easy on & off

Twin riveted lace hooks to lock the gaiter down

Heavy-duty webbing loops for wire attachment (not supplied).

Reinforced stress points for endurance

Angled side closure makes zipping up simple and protects Velcro

Heavy-duty YKK® zippers

Sizes S-2XL

Available in Slate & Desolve® Veil™ Camouflage

SUPER TOUGH GRAVEL GUARDS

Waterproof and comfortable, the SuperTOUGH™ gravel guards keep gravel and grit out of your boots.

Available with or without rear zip, in Black or Desolve® Veil™ Camo

Desolve® Veil™ Camouflage with rear zip - Now available in King-size

YKK® zippers

PINNACLE PUTTIE

The classic puttie style popular with hunters around the world keeps all the shit out of your boots and adds protection from cuts and scrapes to your lower legs. The Pinnacle Puttie takes all these features and boosts up the durability to the highest level. An incredibly tough lace hook is twin riveted to an over-sized tab that gives you plenty of grip. The main body of the gaiters is made from bombproof 500D PU coated oxford nylon for maximum wear resistance surrounded in a quiet outer. All the seams and velcro are double stitched with heavy-duty thread for maximum durability.

Rubberised rear elastic to eliminate riding up your boots

Lined with durable 500D PU coated oxford nylon

Secure front twin riveted lace hook

Durable webbing loops for wire attachments (wires sold separately)

Elasticated hems

Velcro and 3-dome front closure

One size fits most

Available in Forest Green

GAITER WIRES

Serious heavy-duty wires to go underneath your boots to stop your gaiters from riding up.

Compatible with Venom/Basin Gaiters and Pinnacle Putties

Available in sizes XS-XL
